CXT | ENTERPRISES

SOURCING · TRADING · DELIVERY COORDINATION

Trusted Trade. From origin to the world.

We connect producers with professional buyers across agricultural, food and industrial markets, and stay involved from the first specification to the final delivery.

Grains & Oilseeds

Vegetable Oils & Biofuel Feedstocks

Food Products & Ingredients

Industrial Materials & Fertilisers

CXT AT A GLANCE

One partner, from the source to your destination.

CXT Enterprises is a trading company based in Constanța, Romania. We source the product, agree the terms and coordinate the delivery, so you work with one team for the whole trade.

4

product categories

Agricultural, food and industrial goods

3

core origins for grains

Ukraine, Republic of Moldova and Romania

200+

transport units

Combined fleet size across our transport partners

5

clear steps

From your first enquiry to delivery

HOW WE THINK

Trusted trade begins at origin.

We build lasting commercial relationships by connecting dependable suppliers with buyers across international markets. Three habits keep cross-border trade practical, transparent and well coordinated.

01

Know the product

We start with the specification, the application and your requirements as a buyer.

02

Know the source

We work through established relationships with producers and suppliers.

03

Coordinate the journey

We align commercial terms, loading arrangements, documents and delivery.

THE PEOPLE BEHIND CXT

A young company. An experienced team.

Our team brings hands-on experience in international trading, agricultural sourcing, food production, regional logistics and corporate banking.

That mix means we understand both the product and the deal, from supplier discussions and quality requirements to shipment coordination and payment terms.

Trading & Sourcing

Supplier relationships, negotiation and international commodity trading.

Operations & Logistics

Food production knowledge, transport planning and shipment coordination.

Finance & Commercial Structuring

Corporate banking, trade finance and transaction assessment.

YOUR CONTACTS

The people you'll work with

We are a small team, so you always speak directly with the people handling your trade.

WHAT WE TRADE

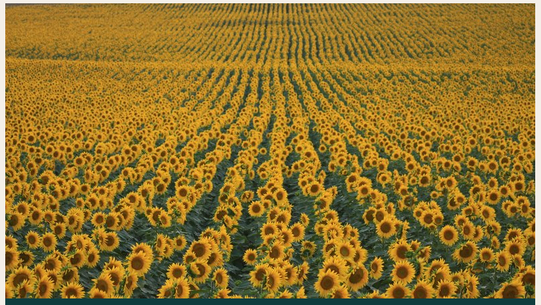

Four categories. One coordinated trade process.

01

Grains & Oilseeds

Corn, wheat, soybeans and sunflower seeds.

02

Vegetable Oils & Biofuel Feedstocks

Sunflower oil, soybean oil and oil blends for biodiesel production.

03

Food Products & Ingredients

Meat, seasoning blends, functional ingredients, dried fruit and nuts.

04

Industrial Materials & Fertilisers

Metals, industrial salt and mineral fertilisers.

PRODUCT CATEGORY 01

Grains & Oilseeds

We supply grains and oilseeds through established relationships with farmers, aggregators and processors, with a particular focus on corn and wheat.

Corn

Feed corn in bulk, with quality parameters and delivery schedules agreed for each transaction.

Wheat

Milling and feed wheat, matched to your intended use and specification.

Soybeans

Sunflower seeds

01

HOW WE SUPPLY

Core sourcing markets

Ukraine, Republic of Moldova, Romania

By road

Bulk supply with road delivery coordination

By rail and sea

Arranged through partners

In every offer

Specifications, quantities and loading points confirmed

PRODUCT CATEGORY 02

Vegetable Oils & Biofuel Feedstocks

We source vegetable oils and feedstocks for food processing and industrial applications, matching the product specification to your production requirements.

FOOD & PROCESSING

Sunflower oil

Crude sunflower oil for further processing.

Soybean oil

Supply requirements and quality parameters agreed for each transaction.

INDUSTRIAL USE

Oil blends for biodiesel production

Specified according to your technical requirements.

Other vegetable oils and feedstocks

According to composition, application and destination.

02

GOOD TO KNOW

For biodiesel feedstocks, composition, traceability and certifications are stated only on the basis of the product documents.

Laboratory results for the current lot are available on request.

Meat & Food Products

We connect food producers with professional buyers, aligning product specifications, packaging and delivery requirements for each destination.

Meat

Sourced to your specification, with every detail agreed offer by offer.

Other food products

Additional sourcing mandates, according to your requirements.

03

AGREED FOR EACH OFFER

- **Product type**
- **Cuts**
- **Chilled or frozen condition**
- **Packaging**
- **Destination requirements**

Seasonings & Functional Ingredients

For meat processors and food manufacturers, we source seasoning blends and functional ingredients, matching flavour profiles and technical requirements to your product and production process.

TASTE

Flavour solutions

Seasoning blends selected for the intended finished product and desired taste profile.

FUNCTION

Functional solutions

Ingredients selected for texture, stability, consistency and processing requirements.

03

CONFIRMED FOR YOUR APPLICATION

Product selection

Dosage

Technical documentation

Supplier technical support can be coordinated where available.

Dried Fruit & Nuts

We source dried fruit and nuts for processors, distributors, foodservice and retail channels.

Pitted dried prunes	Walnut kernels
Dried apricots	Raisins
Dried cherries	Dried sour cherries
Almonds	Fruit-and-nut mixes

03

AVAILABLE FORMATS

- Bulk formats
- Retail packs
- Gift assortments

PRODUCT CATEGORY 04

Industrial Materials & Fertilisers

We support industrial and agricultural buyers with sourcing and trade coordination for materials supplied to agreed technical specifications.

Metals	Steel products and reinforcing steel, with grades, dimensions and delivery requirements defined in each enquiry.
Industrial salt	Technical salt, with purity, particle size, packaging and intended application specified for each order.
Mineral fertilisers	Urea and other mineral fertilisers, with composition, origin, packaging and delivery terms confirmed in each offer.

04

BEYOND THIS LIST

Looking for something else? Additional industrial sourcing mandates can be assessed according to product and destination requirements.

A good product is half the trade.

Getting it there is the other half.

SOURCING & LOGISTICS

From supplier to destination

We combine supplier relationships with practical knowledge of loading points, transport routes and delivery coordination.

200+

transport units

The combined fleet size across our transport partners. Capacity for each shipment is confirmed individually.

WHAT WE COORDINATE ON EVERY SHIPMENT

- Supplier coordination
- Specifications and loading arrangements confirmed
- Carrier selected through our transport partners
- Shipment documents coordinated and verified
- Shipment tracked, with updates for the buyer

Road

Our main mode of shipment coordination.

Rail & Sea

Arranged through partners, according to product, route and volume.

HOW WE WORK

A clear process for every transaction

The same five steps every time, so you always know what comes next.

01

Define the requirement

Product, specification, quantity, destination and delivery period.

02

Confirm the supply

Supplier, origin, availability, quality documents and loading arrangements.

03

Agree the commercial terms

Price, delivery basis, payment terms and contractual requirements.

04

Coordinate the shipment

Loading, transport arrangements, documents and communication.

05

Follow through to delivery

Shipment updates and coordination through to delivery on the agreed basis.

Offers are indicative until confirmed and subject to prior sale. A binding commitment arises only upon signature by both parties.
